

Minutes of Meeting: Space4Climate.org Joint Board Meeting

Date: April 25, 2026

Time: 07:59 AM UTC (1h 25m duration)

Facilitator: Jim Volp

Participants: Alex, Kate, Koray, Lisa, Marc, Norbert, Milica, Samer, Sona.

Meeting Summary

1. Vision and Strategic Alignment

The meeting opened with a palpable sense of momentum and shared purpose. Participants agreed on the project's high potential. Jim stated that the project stands at a pivotal "big opportunity" phase. The feedback showed we are very aligned and agree that the focus must shift toward proving and improving credibility.

- Mission Refinement:** The board discussed refining the mission statement to ensure it truly represents the project's values. Participants suggested more inclusive wording. There was a call to move from just "supporting girls" to ensuring concrete implementation through facilitator training and strategic partnerships.
- The Six-Month Goal:** The core objective for the next half-year is to achieve "world-class, repeatable, and measurable" delivery of online workshops. Jim noted that there is a lot of potential "demand" with +/- a billion children globally. Reaching comparable numbers as ESA education programmes would already be amazing and acts as a good metric of success.

2. Practical Operations and Innovation

- **Scalability Through AI:** To reach a global audience without an "exploding" workload, the team will leverage AI and YouTube's automated subtitling to make content accessible in multiple languages, starting with English as the primary base.
- **Educational Flexibility:** The team discussed the pedagogical structure of the "Space" and "Climate" modules. Jim emphasised flexibility in terms of approach—whether delivering through extracurricular sessions or partnering with agencies like the Brazilian Space Agency to reach multiple schools at once. When the rubber meets the road we will see what works best / most effective.
- **Communication Upgrade:** To sustain the high energy of the volunteer core, the organisation is transitioning from Slack to a more interactive Discord community.
- **Non-Profit Registration:** Jim plans to register the organisation as a non-profit (ANBI) in the Netherlands initially to gain tax benefits, with potential future registration as a 501(c)(3) in the U.S..
- **Website Maintenance:** Critical bugs on the website, specifically the session booking and PayPal donation components, will be fixed immediately.

3. Strategic Outreach: The "Kigali Opportunity"

A major highlight was the upcoming opportunity in Kigali, Rwanda. The board identified this as a critical moment to interact with space agencies, industry leaders, and local students.

- **Promotional material:** The team discussed the need for promotional materials, including a "pack" for stakeholders and local engagement.
- **Partner Networking:** Partnership with AIAA, World Space Week, WIA etc were identified as drivers for growth and ultimately "top-down" endorsements from ESA, NASA, CNSA.

Closing Spirit: Jim expressed his deep commitment to "move the torch" acknowledging that while the amount of work is "crazy," the potential impact on children's education is worth the effort. The meeting concluded with a renewed sense of interactivity and commitment from everybody.

Practical ideas (some repeat with summary above)

The meeting generated several practical and innovative ideas designed to bridge the gap between high-level vision and on-the-ground impact. Here are the core practical strategies proposed:

Strategic Outreach & Branding

- **The "Kigali Pack":** To maximise the upcoming trip to Rwanda, the team will create a physical promotional "pack" for stakeholders. This includes stickers with the project's logo and a **QR code** for immediate digital follow-up, updated business cards which are micro-brochures, small leaflets.
- **Leveraging Leverage:** Use existing sponsorships (such as with the AIAA) to weave project mentions into high-level industry conversations.
- **Data-Driven Marketing:** Jim possess multiple "troves of contacts" which will be used "peu-a-peu" not to generate an initial massive interest that can't be supported immediately.

Technical & Digital Innovation

- **AI-Powered Localisation:** To solve the challenge of translating materials into multiple languages, the project will utilise **AI and YouTube's automated subtitling**. This allows them to maintain one high-quality English master version while reaching non-English speaking students at scale.
- **Website Recovery:** Prioritise fixing the **session booking and PayPal donation** modules on the website to ensure not to miss out on potential "customers" and donors.

- **Transition to Discord:** To foster a higher level of interactivity and energy among core volunteers, the organisation will move its daily communications from Slack and WhatsApp to **Discord**.

Educational Delivery

- **Platform Sharing:** Collaborate with the **Brazilian Space Agency**, utilising their existing platform to host sessions where multiple schools can participate simultaneously.
- **Asynchronous Learning:** Explore creating **pre-registered video content** for high school students, allowing them to access specific space-for-climate topics at their own pace iow a [MOOC](#).
- **Module "Beta Testing":** Before the full global rollout, the team will conduct several **online test runs** of the "Space" module to ensure it is delivery-ready and optimised for student engagement.

Organisational Integrity

- **Practical Inclusivity:** Instead of just a mission statement phrase, the board proposed training **online facilitators** to actively prioritise questions and engagement from girls during live sessions.
- **Legal Foundations:** Secure **Dutch ANBI status** (non-profit designation) first to gain immediate tax benefits and official credibility, using a (befriended) notary before pursuing U.S. registration.
- **Biannual Accountability:** Establish a formal **six-month update cycle** with the Board of Advisors to ensure transparent reporting on progress and roadblocks.

Action Item	Responsible	Status/ Deadline
Refine Mission Statement: Update wording regarding "focus on girls" and diversity based on board feedback.	Jim	Upcoming
Website Fixes: Fix session booking & PayPal functions of website	Jim	Immediate
Kigali Preparation: Create "promo pack" including: QR code, stickers, updated "business cards" (=micro brochure). 1/3 A4 leaflet.	Jim	Before Kigali
Beta-testing: Conduct online test runs and beta testing for the "Space" module to ensure it is delivery-ready.	Jim	Immediate
Strategic Contacts: Provide names of contacts in Rwanda/Kigali to support local outreach.	All	Immediate
Strategic Advocacy: Mention project during (AIAA) conversations to spread awareness among space agencies and industry partners.	Lisa + all	Ongoing
Discord Setup: Transition communication to Discord to improve engagement with core volunteers.	Jim	Immediate
Legal Registration: Proceed with Dutch ANBI non-profit registration to secure tax benefits before pursuing US 501(c)(3) status.	Jim	Immediate
Biannual Meeting: Schedule a formal update meeting in six months.	Jim	Upcoming
